Lerchenweg 36, 3012 Bern

«Much has been made of the ‘wicked problems’ posed by contemporary environmental problems, with ecological thinkers claiming that the climate crisis is so vast and complicated that it challenges received ethics and defeats our capacity for taking responsibility. This talk considers challenges to practices of responsibility issuing from post- and anti-humanists and the promise and pitfalls of responses that reject individualistic notions of autonomous agency in an effort to recognize the dependent character of agency…»
